Features of the square pots, the anti-spiralling square pots and the grid bottom square pots

- The square plastic pots allow an exploitation of the surface 44% more than any other round pot with the same capacity
- The special anti-spiralling veins force vertically the root development and prevent its winding. It allows a rapid growth and a strong plant resistance.
- The grid bottom square pots, thanks to the filtering of air and light, allow the roots to ramify.

Suitable for several kinds of growing, an extraordinary range of various sizes is available. Especially recommended for: fruit trees, ornamental, flowering and reforestation plants. The square pots, the anti-spiralling square pots and the grid bottom square pots will meet all your need.
